

## Are you ready to help?

- + Visualization of readiness for action across locations
- + Automation via GPS-controlled Geofences
- + Advance planning of attendance and absence
- + Notification in case of staff shortage
- + Free for firefighters, relief organizations and the technical relief organization with up to 50 members

## Optimal alerting!

- + Targeted alerting using app and GSM pager with Europe-wide, redundant network coverage
- + SMS and voice call as intelligent redundancies
- + Operationally-related feedback
- + Alerting is possible via many interfaces: Mail, BosMon, POCsAG, REST
- + Alerting monitor with all important informations: Keyword, report, map, alerted vehicles, FMS status and availability of alerted persons

## Readiness for action visualized in real time

With DIVERA 24/7, the availability of relief forces is recorded in advance. With this knowledge, it is possible at any time for dispatchers and commanding officers to plan operations on the basis of significant numbers and to send impactful aid. Personal passports can be seen before the alerting sets place, response times and protective targets can be satisfied.

- + Central overview of all locations, manning levels and operating resources
- + Continual analysis of the efficiency using the review of manning level by individual criteria
- + Intuitive traffic light system

## A system with added value

The service of DIVERA 24/7 includes a great deal more than simply the question of availability. The retrospective analysis helps to detect and to eliminate personal passports.

Targeted information management with the help of the DIVERA 24/7 app increases transparency. The direct possibility of responding accelerates the exchange and assists managers with planning.

- + Detect frequent passports and missing key functions
- + Demand planning with real-life data
- + Notifications, surveys and appointments improve the internal communication
- + Diverse configuration possibilities to adapt the system to the own demands

## Testing DIVERA 24/7

Basic functions can be tested up to 50 persons for free:
